Medi-Check | Surface Residue

Medi-Check supports infection prevention and infection control procedures by accurately verifying the cleanliness of washer disinfectors, dental, and surgical equipment. The test detects protein residues left behind after improper cleaning. Simply swab a surface, activate the test, and if any protein residue is present, the reagent will turn purple. The more contamination present, the quicker and darker the color change to purple. Medi-Check quickly verifies the cleanliness of equipment, allowing immediate corrective action to be taken if necessary.

Benefits:
- Results in 15-30 minutes
- Easy to interpret color change
- All-in-one device – no instrumentation required
- Pre-moistened swab assists in sample collection for accurate results
- Low carbon footprint devices are 100% recyclable
- 18 month shelf life at room or refrigerated temperatures (2-25°C)

Sensitivity:
- Detects 3 µg protein after 30 minutes at 37°C or 15 minutes at 55°C
